**St. George College
Aruvithura**

About

St. George's College, Aruvithura is a college under Malankara Catholic University, Kottayam. It is located in Aruvithura, Eratturam, Kottayam District in Kerala, India. It was reconstituted with 'Aru' (Crab) by NCM, for seven years in the month of July. St. George's College, Aruvithura, is a minority educational institution.

Founded by St. George's Church, Aruvithura in 1982. Placed under the patronage of the Excellence Mar Theodosius Varghese, the first Bishop of Fula, and elevated by a host of ministers and philanthropists like Very Rev. Fr. Thomas (Catholic) and Mr. T. A. Thomas (Former Minister), the college, right from its inception, embarked on an odyssey towards academic excellence. Very Rev. Fr. Thomas Mandilam, the founding manager and a great visionary, was truly instrumental in laying the foundations for a great beginning and Very Rev. Fr. Joseph Chelakkal, who followed him, was equally diligent and insightful in his efforts, guiding the college during the early stages of its growth. Far more than just a school, the Excellence Mar Joseph Pallikongal, the Bishop of Fula, had been the patron of the college. The Excellence Mar Joseph Pallikongal is the present patron of this seat of learning. Currently, the college offers 17 undergraduate courses and 2 postgraduate courses and the Department of Chemistry and Physics are recognized Research Centers under MG University.

```
Enter Second Number:
<input type="number" id="n2"><br>
<input type="button" value="Submit" id="mul">
<p id="rs"></p>
</body>
</html>
```

Output

Calculator

Enter First Number: 4
Enter operator: +
Enter Second Number: 3

result:7

Calculator

Enter First Number: 4
Enter operator: -
Enter Second Number: 3

result:1

Program 11

Use Regular expression for validation in login page Using JavaScript.

Aim

Use Regular expression for validation in login page Using JavaScript.

```
<!DOCTYPE html>
<html>
<head><title>Login</title>
<script>
function login()
{
    let mail=document.getElementById("mail").value;
    let pattern=/\w+@\w+\.\.+/;
    if(!pattern.test(mail))
    {
        alert("enter a valid email");
        return;
    }
    let pass=document.getElementById("pass").value;
    if(pass.length<6||pass.length>12)
    {
        alert("Password must be 6-12 characters only");
        return;
    }
    if(mail.trim()=="")
    {
        alert("Username is empty");
        return;
    }
    if(pass.trim()=="")
    {
        alert("Password required");
        return;
    }
    alert("Login successfully");
};
</script>
<body>
<h3>login Page</h3>
Email
```

```
<input type="text" id="mail"><br><br>
Password:
<input type="password" id="pass"><br><br>

<input type="button" value="Login" onclick="login()">
</body>
</html>
```

Output

login Page

Email

Password:

This page says
enter a valid email

OK

login Page

Email

Password:

This page says
Password must be 6-12 characters only

OK

login Page

Email

Password:

This page says
Login successfully

OK

Program 12

Write a program to retrieve data from a text file and display it.

Aim

Write a program to retrieve data from a text file and display it.

Index1.html

```
<!DOCTYPE html>
<html>
<head>
<title>AJAX JSON Example</title>
</head>

<body>

<h2>Student List</h2>

<button onclick="loadStudents()">Load Students</button>

<ul id="result"></ul>

<script>

function loadStudents()
{
    let xhr = new XMLHttpRequest();

    xhr.open("GET", "students.json", true);

    xhr.onload = function()
    {
        let students = JSON.parse(xhr.responseText);

        let output = "";

        for (let i in students)
        {
            output += "<li>" + students[i].name +
                " - " + students[i].course +
                " - " + students[i].mark +
                "</li>";
        }
    }
}
```

```
document.getElementById("result").innerHTML = output;
};

xhr.send();
}
```

</script>

</body>

</html>

Ajax.json

```
[
  {"name": "Arun", "course": "BCA", "mark": 85},
  {"name": "Meera", "course": "BCA", "mark": 91},
  {"name": "Rahul", "course": "BCA", "mark": 78},
  {"name": "Anjali", "course": "BCA", "mark": 88}
]
```

greet.php

```
<?php
```

```
$name = $_POST['username'];
```

```
echo "Hello, " . $name;
```

```
?>
```

Output

Student List

Load Students

- Arun - BCA - 85
- Meera - BCA - 91
- Rahul - BCA - 78
- Anjali - BCA - 88

Program 13

Create a webpage using Frames with rows and columns, where we will have header frame, left frame, right frame and status frame on clicking left frame, information should be displayed in the right frame.

Aim

Create a webpage using Frames with rows and columns, where we will have header frame, left frame, right frame and status frame on clicking left frame, information should be displayed in the right frame.

frame.html

```
<!DOCTYPE html>
<html>
<head><title>St george</title>
